Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 17-21, drawn to a method for power ramping in a transceiver having a power ramplifier and a pair of up-converter-mixers, classified in class 455, subclass 13.4.
 - II. Claims 8-16 and 22-25, drawn to a digital transceiver and its internal circuitry for operating the digital transceiver with a control of a VCO used in a wireless communications system for receiving a signal, particularly, in a wireless local LAN, classified in class 455, subclass 86.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, and II are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I drawn to a method for power ramping in a transceiver having a power ramplifier and a pair of up-converter-mixers, classified in class 455/13.4. The subcombination has separate utility whereas invention II is about a digital transceiver and its internal circuitry for operating the digital transceiver with a control of a VCO used either in a wireless communications system and a

wireless local LAN for receiving a signal, classified in class 455/86. The power ramping technique is a general procedure in power controlling technique, and the subcombination has separate utility whereas invention II is about an internal circuitry of a transceiver, which goes further with more details of components of the transceiver, i.e, a receiver, a transmitter, a frequency synthesizer including a VCO, a controller for isolating the power amplifier, and a multiplier, and the switching technique between internal components, while invention I does not require to include or disclose those components therein. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
